

John Doe

Full-Stack Machine Learning Engineer Location: Mumbai, Maharashtra | Phone: +91-9876543210 Email: john.doe@example.com | LinkedIn: <https://www.google.com/search?q=linkedin.com/in/johndoe> | GitHub: <https://www.google.com/search?q=github.com/johndoe>

Professional Summary

Results-driven software engineer with expertise in building end-to-end machine learning pipelines and scalable web applications. Proficient in Python, JavaScript, and modern web frameworks like React and Node.js. Passionate about bridging the gap between data science and production-ready applications using DevOps best practices.

Technical Skills

- **Languages:** Python, JavaScript, HTML/CSS, Java, SQL
 - **Machine Learning & Data Science:** TensorFlow, PyTorch, Scikit-Learn, Pandas, NumPy, PCA, K-means clustering, Deep Learning, Computer Vision
 - **Web Development:** React, Node.js, Express, FastAPI, Uvicorn, Jinja2
 - **Databases:** MongoDB, PostgreSQL
 - **Tools & DevOps:** Git, Docker, CI/CD, RESTful APIs, Web Scraping (Beautiful Soup)
 - **Core Concepts:** Data Structures & Algorithms (DSA), Modular Coding, Exploratory Data Analysis (EDA)
-

Projects

Med-Scan Diagnostic Assistant | *Full-Stack ML Workflow*

- Architected an end-to-end application to assist in diagnosing medical imaging data using deep learning techniques.
- Developed a backend API using FastAPI to serve the machine learning model and handle client requests efficiently.
- Built an interactive frontend using React to allow users to upload scans and view diagnostic predictions.
- Implemented automated data ingestion and cleaning pipelines to preprocess image data before model inference.

AI-Driven Solutions - Smart India Hackathon (SIH) | Team Lead / AI Developer

- Collaborated with a cross-functional team to develop an AI-based solution for a national-level problem statement.
 - Designed the backend infrastructure using Node.js and MongoDB to manage real-time user data.
 - Integrated anomaly detection algorithms to identify irregular patterns within the dataset, improving system accuracy by 15%.
-

Experience

Software Engineering Intern *TechNova Solutions | May 2025 – August 2025*

- Assisted in developing REST APIs for data-intensive web applications using Python and FastAPI.
 - Optimized backend database queries in MongoDB, reducing data retrieval times by 20%.
 - Wrote unit tests and engaged in code reviews to ensure robust modular coding practices.
 - Collaborated with the IT service desk to deploy applications using basic DevOps principles, ensuring smooth continuous integration.
-

Education

Bachelor of Technology in Computer Science *University of Engineering and Technology | Expected Graduation: May 2027*

- **Relevant Coursework:** Artificial Intelligence, Advanced Data Structures & Algorithms, Web Engineering, Database Management Systems, DevOps Fundamentals.
