AI & DATA SCIENCE UNDERGRADUATE | PYTHON & MACHINE LEARNING FOCUS

Artificial Intelligence & Data Science undergraduate with a primary focus on Python-based data science and machine learning workflows. Experienced in working with data, understanding ML fundamentals, and applying analytical thinking to problem-solving. Possesses a solid foundation in Java-based Data Structures & Algorithms, supporting structured and efficient logic design.

TECHNICAL SKILLS

Primary Focus – Python & Data Science

- Python for data analysis and machine learning
- Data preprocessing & exploratory data analysis (EDA)
- Machine learning fundamentals
- Model training & evaluation concepts

Programming & CS Foundations

Python, Java, C

Data Structures & Algorithms (Java – secondary strength)

Object-Oriented Programming

Tools

NumPy, Pandas, Matplotlib, scikit-learn

Jupyter Notebook, Git, GitHub, VS Code

PROJECT EXPERIENCE

Interview Preparation Platform – Data & Logic-Oriented Application

- Worked on an interview practice platform involving structured data handling and performance tracking.
- Designed logical workflows using strong algorithmic thinking.
- Gained exposure to analyzing user progress patterns through data.
- Strengthened ability to translate problem statements into clean, structured solutions. GitHub: https://github.com/rishigogia1/Full_Stack_Project

Smart Traffic Monitoring System (Edge Computing)

Academic Project | Planned

- Designed a real-time traffic monitoring system using Computer Vision and Edge Computing for vehicle detection and congestion analysis
- Proposed a low-latency edge-cloud architecture for efficient and scalable traffic management
- Tech Stack: Python, OpenCV, YOLO, Flask/Node.js, React

EDUCATION

Bachelor of Technology – Artificial Intelligence & Data Science

Vivekanand Education Society Institute of Technology (VESIT), Mumbai

Expected Graduation: May 2027

CERTIFICATIONS

- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp – Udemy
- Fundamentals of Deep Learning – NVIDIA
- Generative AI & ChatGPT – Udemy
- Git & GitHub Bootcamp – Udemy

AREAS OF INTEREST

Applied Machine Learning using Python

Data-driven problem solving

Model experimentation and improvement
