

# RISHI GOGIA

Mumbai, India | +91 73831 94643 | rishigogia30@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

---

AI & Data Science undergraduate with hands-on experience building LLM-powered applications, NLP pipelines, and full-stack platforms. Proficient in Python, machine learning, and end-to-end system design spanning React/Node.js backends to mobile (Flutter). Seeking internship or fresher roles in AI/ML engineering, software development, or data science.

## TECHNICAL SKILLS

---

**Languages:** Python, Java, C

**AI / ML:** Machine Learning, NLP, LLMs (GPT-3.5/4), Model Evaluation, Exploratory Data Analysis

**Libraries & Frameworks:** NumPy, Pandas, Matplotlib, scikit-learn, React.js, Node.js, Express.js, Flutter

**Databases & Cloud:** MongoDB, Firebase, AWS (Cloud Foundations & Developer certified)

**Tools & Platforms:** Git, GitHub, Jupyter Notebook, Android Studio, JWT Authentication

**Core CS:** Data Structures & Algorithms, Object-Oriented Programming

## PROJECTS

---

### AI Career Copilot — AI/NLP-Powered Career Optimization System

Jan 2025 - Apr 2025

*Tech Stack: React.js, Node.js, MongoDB, GPT-3.5, NLP*

- Architected a full-stack AI career assistant integrating GPT-3.5 to automate resume analysis, semantic job matching, and personalized interview preparation workflows.
- Built an NLP pipeline for unstructured resume parsing — extracting structured skill profiles, identifying gaps, and generating contextual recommendations aligned with target job descriptions.
- Developed a semantic skill-gap analysis engine that compares candidate profiles against job requirements and surfaces actionable improvement areas.
- Integrated LLM-driven resume enhancement suggestions and AI-assisted mock interview generation, reducing manual career coaching effort significantly.

### Interview Preparation Platform — AI-Powered Practice System

Sep 2024 - Dec 2024

*Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT*

- Built an end-to-end interview practice platform supporting coding, system design, and behavioral questions with AI-based question generation and real-time adaptive scoring.
- Designed a performance analytics dashboard enabling users to track progress over sessions, identify weak topic areas, and monitor improvement trends.
- Engineered a session management system with customizable practice workflows, secure JWT-based authentication, and role-based access control.
- Implemented adaptive difficulty logic to personalize question selection based on user performance history, improving learning efficiency.

### Fixify — On-Demand Home Services Platform

Mar 2024 - Aug 2024

*Tech Stack: Flutter, Dart, Firebase, Android Studio*

- Developed a cross-platform mobile application (Android/iOS) connecting customers with verified local service professionals across categories including plumbing, electrical, carpentry, and appliance repair.
- Designed separate customer and service-provider modules with authentication, booking management, real-time order tracking, and profile management using Firebase.
- Implemented Firebase real-time database for live booking updates and secure user authentication with role-based access control.
- Architected a modular, scalable service category framework to support rapid addition of new service verticals without structural changes.

## EDUCATION

---

### **B.E. Bachelor of Engineering - Artificial Intelligence & Data Science**

*Expected May 2027*

Vivekanand Education Society Institute of Technology (VESIT), Mumbai

Aggregate CGPA: 8.23 / 10 (up to Semester 5)

## CERTIFICATIONS

---

- AWS Academy Graduate - Cloud Developing & Cloud Foundations
- Fundamentals of Deep Learning - NVIDIA
- Applications of AI for Predictive Maintenance - NVIDIA
- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp - Udemy
- Generative AI & ChatGPT - Udemy
- Git & GitHub Bootcamp - Udemy

## HACKATHONS & CO-CURRICULAR

---

- Syrus '25 - VESIT Inter-College Hackathon: Competed in a 24-hour hackathon, developing an AI-powered solution under time constraints.
- Invictus '26 - VESIT Technical Fest: Participated in competitive technical problem-solving event focusing on software engineering challenges.
