Mumbai, India | +91 73831 94643 | rishigogia30@gmail.com | [LinkedIn](#) |

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience across the machine learning workflow — data preprocessing, feature engineering, and model evaluation using Python, scikit-learn, Pandas, and NumPy — alongside Generative AI application development using LLMs (GPT, Gemini API) and Streamlit. Skilled in designing and deploying AI/ML-powered tools — including chatbots, resume optimizers, and quiz generators — with structured JSON outputs and secure API integrations. Passionate about applying machine learning and NLP techniques to build live, deployable projects, showcased through personal portfolios on Streamlit Cloud, Vercel, and GitHub.

TECHNICAL SKILLS

Languages: Python, Java, C

Machine Learning: scikit-learn, Pandas, NumPy, Supervised & Unsupervised Learning, Feature Engineering, Data Preprocessing, Model Evaluation

AI / GenAI: Generative AI, LLMs (GPT-3.5/4, Gemini API), Prompt Engineering, NLP, JSON Mode / Structured Outputs

Frameworks & Tools: Streamlit, React.js, Flutter

Deployment & Cloud: Vercel, Streamlit Cloud, GitHub, Firebase, AWS (Cloud Foundations & Developer certified)

Databases: MongoDB, Firebase Realtime Database

Other: API Security (key management), Git, Jupyter Notebook, Data Structures & Algorithms

PROJECTS

AI Career Copilot — AI/NLP-Powered Career Optimization System *Jan 2025 – Apr 2025*

Tech Stack: Python, Streamlit, GPT-3.5/4 API, NLP, React.js, MongoDB

- Leveraged the GPT-3.5 API with advanced prompt engineering techniques to automate resume analysis and semantic job matching, applying NLP-based text similarity methods for personalized interview preparation — deployed as a live Streamlit web app.
- Built an NLP data pipeline to preprocess and parse unstructured resume text, engineer structured skill-profile features, identify skill gaps, and generate contextual recommendations aligned with job descriptions.
- Designed an AI-powered mock interview generator using LLM prompting, with adaptive question generation based on candidate profile and target role.
- Applied secure API key management practices throughout the project; published source code and live demo link on GitHub.

Interview Preparation Platform — AI-Powered Practice System *Sep 2024 – Dec 2024*

Tech Stack: Python, Streamlit, GPT API, React.js, MongoDB

- Built an end-to-end interview practice platform with AI-based question generation using LLM prompting across coding, system design, and behavioral categories — deployed with a live public link.
- Implemented JSON mode structured outputs to dynamically render quiz questions, flashcards, and scoring rubrics in the user interface.
- Engineered adaptive difficulty logic using prompt chaining to personalize question selection based on user performance history, improving learning efficiency.
- Designed a performance analytics dashboard enabling users to track progress, identify weak topic areas, and monitor improvement trends across sessions.

Fixify — On-Demand Home Services App *Mar 2024 – Aug 2024*

Tech Stack: Flutter, Firebase, Dart

- Developed a cross-platform mobile application (Android/iOS) with real-time booking updates and secure role-based authentication using Firebase.
- Designed modular service category architecture enabling rapid addition of new service verticals; deployed on GitHub with full documentation.

EDUCATION

B.E. in Artificial Intelligence & Data Science — *Expected May 2027*

Vivekanand Education Society Institute of Technology (VESIT), Mumbai | **CGPA: 8.23 / 10 (up to Semester 5)**

CERTIFICATIONS

- AWS Academy Graduate — Cloud Developing & Cloud Foundations
- Fundamentals of Deep Learning — NVIDIA
- Applications of AI for Predictive Maintenance — NVIDIA
- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp — Udemy
- Generative AI & ChatGPT — Udemy
- Git & GitHub Bootcamp — Udemy

HACKATHONS & CO-CURRICULAR

- Syrus '25 — VESIT Inter-College Hackathon: Built an AI-powered solution under 24-hour time constraints, applying GenAI and rapid deployment practices.
- Invictus '26 — VESIT Technical Fest: Competed in software engineering challenges focused on AI application design and problem-solving.
